**BANCO DE GALICIA Y BUENOS AIRES S.A. REPORTS EARNINGS**  
**FOR THE QUARTER ENDED JUNE 30, 2009**

(Buenos Aires, Argentina, August 10, 2009) – Banco de Galicia y Buenos Aires S.A. (the “Bank”, Buenos Aires Stock Exchange: GALI) today announced its financial results for the quarter ended June 30, 2009.

- **Net income for the first quarter of FY 2009 amounted to Ps.41.1 million and adjusted net income to Ps.68.9 million, representing increases of 7.9% and 19.8% respectively, as compared to the same quarter of the previous year.**
- **As of June 30, 2009, the Bank’s credit exposure to the private sector reached Ps.14,482 million. Out of the Ps.11,528 million of loans outstanding to the private sector, 83.2% correspond to financing granted to SMEs and individuals. On the other hand, total deposits raised in Argentina amounted to Ps.15,121 million, with a 17.5% increase year-over-year.**
- **Exposure to the non financial public sector decreased by Ps.1,500 million during the last twelve months, representing a decrease over total assets of more than 8 percentage points.**
- **During the last 12 months, the Bank recorded a significant improvement in the efficiency ratio, due to the increase in absolute values of operating income -which tripled the increase of administrative expenses- based on the improvement in the structure of assets and liabilities.**
- **In order to consolidate its expansion strategy in the Argentine financial market, the Bank entered into an agreement with American International Group Inc. (“AIG”), to purchase 80% of the shares of Compañía Financiera Argentina S.A. (“CFA”), which is subject to the approval of the Argentine Central Bank. CFA is a leading provider of personal loans in Argentina, with 93 branches, distribution agreements with more than 3,900 retailers and approximately 1 million customers.**

## NET INCOME FOR THE QUARTER ENDED JUNE 30, 2009

In the second quarter of FY 2009, the Bank recorded a Ps.41.1 million profit, compared with a Ps.38.1 million profit for the same quarter of the previous year.

Excluding the Ps.27.8 million loss from the amortization of deferred losses from *amparo* claims, the adjusted net income for the second quarter of FY 2009 amounted to Ps.68.9 million, compared to a Ps.57.5 million profit in the same quarter of the previous year. The latter figure excludes a Ps.6.8 million loss from the adjustment to the valuation of public-sector assets and a Ps.12.6 million loss from the amortization of deferred losses from *amparo* claims.

The higher amortization of deferred losses from *amparo* claims recorded during the second quarter of FY 2009, with respect to those of the same quarter of the prior year, is attributable to the fact that beginning in January 2009, the Bank began to amortize in 36 monthly installments the amount deferred beyond the original schedule, as of December 31, 2008.

The improvement in adjusted net income was mainly a consequence of the Ps.120.3 million increase in the adjusted operating income<sup>(1)</sup>, partially offset by higher loan loss provisions (which were up Ps.50.7 million) and higher administrative expenses (which were up Ps.39.1 million).

The adjusted operating income for the quarter totaled Ps.719.5 million, up 20.1% from the Ps.599.2 million recorded in the second quarter of the prior year. This positive development was due both to a higher adjusted net financial income (up Ps.69.2 million) and a higher net income from services (up Ps.51.1 million).

(\*) Annualized.

(1) Financial Margin: Financial Income minus Financial Expenses, divided by Average Interest-earning Assets.

(2) Operating Income: Net Financial Income plus Net Income from Services.

Net financial income for the second quarter of FY 2009 amounted to Ps.361.0 million, up Ps.75.1 million from the second quarter of the previous fiscal year. Including the Ps.7.0 million financial income from security margins of repurchase agreement transactions, the Bank’s adjusted net financial income for the second quarter of FY 2009 amounted to Ps.368.0 million. Excluding the Ps. 6.8 million loss from the adjustment to the valuation of public sector assets and including the Ps. 6.1 million financial income from security margins of repurchase agreement transactions, the adjusted net financial income for the second quarter of FY 2008 was Ps.298.8 million.

The quarter’s net financial income includes a Ps.35.1 million profit from quotation differences, net of the results from foreign-currency forward transactions. This profit was composed of a Ps.35.9 million gain from FX brokerage, offset by a Ps.0.8 million loss from the valuation of the Bank’s net foreign-currency position. In the same quarter of the prior year, the gain from quotation differences was of Ps.30.9 million (composed by a Ps.49.2 million gain from FX brokerage and a Ps.18.3 million loss from the valuation of the foreign-currency net position).

The quarter’s adjusted net financial income before quotation differences amounted to Ps.332.9 million, with a Ps. 65.0 million increase as compared to the Ps.267.9 million income of the same quarter of 2008, mainly as a consequence of the profits associated with the Peso-denominated matched portfolio, offset by the loss on the foreign-currency denominated matched portfolio.

The increase in the adjusted net financial income was a consequence of the improvement in the structure of interest-bearing liabilities, due to an increase in the participation of transactional deposits and a reduction of the Bank’s restructured foreign debt, and of a higher return on private sector and public sector interest-earning assets.

The average interest-earning assets decreased by Ps.2,002 million as compared to the same quarter of the previous fiscal year, mainly as a result that the balances held with the Argentine Central Bank in order to fulfill the minimum cash requirements established for term liabilities are no longer being remunerated.

The average yield on interest-earning assets increased 361 basis points (“b.p.”) during the year, due to: (i) an 820 b.p. increase in the average yield on government securities, and (ii) a 276 b.p. increase in the interest rate of loans to the private sector together with an increase in the relative weight of such loans within total interest-earning assets. The average yield on interest-earning assets was partially offset by the negative average yield on financial trust securities (-1,212 b.p.), mainly as a consequence of the valuation of the underlying assets held by Galtrust I Financial Trust pursuant to Communiqué “A” 4898 of the Argentine Central Bank.

Provisions for loan losses for the second quarter of FY 2009 amounted to Ps.144.7 million, Ps.50.7 million more than in the same quarter of the prior year. The amount recorded during the quarter corresponds, mainly, to the individuals’ portfolio.

Net income from services amounted to Ps.351.5 million, up 17.0% from the Ps.300.4 million recorded in the second quarter of the previous fiscal year. The increase of fees related with national and regional credit cards (22.8%) and with deposit accounts (30.7%) stands out. This result reflects the increase in the Bank’s volume of transactions, together with certain adjustments in the price of some services, in line with the dynamics of the Argentine financial market.

Administrative expenses for the quarter totaled Ps.474.2 million, up 9.0% from the same quarter of the previous year. Personnel expenses grew 15.6%, mainly as a consequence of a salary increase agreement with the Union. The staff decreased by 845 employees (8.7%) between the second quarters of 2008 and 2009. The remaining administrative expenses increased only 1.2%, due to the significant decrease of Ps.17.1 million on advertising and publicity expenses. Excluding this item, the remaining administrative expenses grew 12.3%, mainly as a consequence of the inflation during the period.

Net other losses for the quarter amounted to Ps.18.2 million, compared to a Ps.6.0 million profit for the same quarter of the prior fiscal year. The decrease of the quarter's loss was mainly due to: (i) higher amortization of deferred losses from *amparo* claims, for Ps.15.2 million, as a consequence that, beginning in January 2009, the Bank began to amortize in 36 monthly installments the amount deferred beyond the original schedule as of December 31, 2008 and (ii) higher net establishment of reserves, for Ps.15.4 million.

The income tax charge was of Ps.29.8 million, Ps.7.7 million higher than in the second quarter of FY 2008. This charge corresponds mainly to the regional credit-card companies.

## LEVEL OF ACTIVITY

As of June 30, 2009, the Bank's total exposure to the private sector reached Ps.14,482 million, with loans amounting to Ps.11,528 million. The last figure includes Ps.2,542 million corresponding to the regional credit card companies, increasing 12.1% during the last twelve months.

The Bank's market share of loans to the private sector as of June 30, 2009 was of 6.58%, compared to a 6.48% and a 7.05% from March 31, 2009 and June 30, 2008, respectively.

Also includes the outstanding balances of the loans securitized by the regional credit-card companies.

Total gross loans as of June 30, 2009, amounted to Ps.11,535 million, including only Ps.7 million of exposure to the financial and non-financial public sectors. A year before these figures amounted to Ps.12,395 million and to Ps.1,380 million, respectively. The decrease of the exposure to the financial and non-financial public sectors was mainly due to the Bank's swap at market prices of National Secured Loans for other public-sector assets, made during January 2009.

Out of the total loans to the private sector, the higher annual growth was registered in loans granted to large corporations (26.1%) and to individuals (10.6%), while those granted to SMEs decreased (10.4%). By sector of activity, growth was concentrated, mainly, in consumer loans (10.3%).

As of June 30, 2009 the Bank's total exposure to the public sector amounted to Ps.5,302 million, with a Ps.566 million reduction (9.6%) from the same date of the prior year. Excluding debt securities issued by the Argentine Central Bank, net exposure to the non-financial public sector decreased by Ps.1,500 million (or 26.9%), from Ps.5,568 million as of June 30, 2008 to Ps.4,068 million as of June 30, 2009. Such decrease was not only due to the reception of assets issued by the Argentine Central Bank as part of the exchange of National Secured Loans carried out by the end of January, 2009, but also due to sales of other public sector assets received in such exchange. Likewise, this decrease was boosted by the Ps.673 million decrease in the balance of Boden 2012, as a consequence of the sale of the 15<sup>th</sup> interest and amortization coupon, and to the collection of the amortization installment of August, 2008, partially offset by the depreciation of the Peso during the period.

Out of the Ps.5,302 million exposure to the public sector, Ps.1,234 million corresponded to securities issued by the Argentine Central Bank.

(1) In Special Investment from April 1, 2009 on. Until March 31, 2009 they were registered as established by caption 2 of Communiqué "A" 4989 of the Argentine Central Bank.

Equity investments amounted to Ps.59.4 million.

The item "Bank Premises and Equipment, Miscellaneous and Intangible Assets" includes Ps.294 million of net deferred losses associated to *amparo* claims.

The Bank's consolidated deposits amounted to Ps.15,115 million, of which Ps.236 million were deposits in Galicia Uruguay.

As of June 30, 2009, the Bank's deposits in Argentina amounted to Ps.15,121 million, representing a 17.5% increase as compared to June 30, 2008, and a 11.9% annualized increase during the quarter.

As regards the share of Dollar-denominated deposits in total deposits, the Bank showed a similar behavior to that of the Argentine financial system as a whole, with a 72.3% increase during the last twelve months and a 35.2% annualized growth during the quarter. The increase in Dollar-denominated deposits includes the variation of the exchange rate during the period. In addition, Peso-denominated deposits recorded a 9.0% increase year-over-year and a 7.0% annualized increase during the quarter.

(\*\*) *Beginning in December 2008, deposits from AFJPs are included as deposits from the public sector.*

Other financial liabilities amounted to Ps.7,718 million, Ps.398 million higher than in the same quarter of fiscal year 2008, mainly due to an increase in the balance of spot transactions pending settlement, of repurchase agreement transactions with the Argentine Central Bank and of financing to merchants in connection with credit-card activities. These increases were partially offset by the reduction of foreign currency denominated debt, as a consequence of the cancellation of repurchase agreement transactions and of a US\$ 166 million decrease in the balance of negotiable obligations due to amortizations and cancellations in advance of the Bank's Head Office restructured foreign debt, and by the prepayment of the remaining debt of Banco Galicia Uruguay.

## CAPITALIZATION AND LIQUIDITY

As of June 30, 2009, the Bank's consolidated computable capital exceeded by Ps.1,025 million the Ps.1,657 million minimum capital requirement. This excess was of Ps.854 million as of June 30, 2008.

The Ps.106 million increase in the minimum capital requirement compared with June 30, 2008 was mainly attributable to the Ps.78 million higher requirements in connection with financing to the non-financial public sector, mainly due to the increase of the coefficient "Alfa 1" from 0.75 to 1.00, thus eliminating the reduction coefficient from January 2009 on.

The Ps.277 million increase in computable capital, as compared to June 30, 2008, was mainly a consequence of: (i) higher core capital, for Ps.198 million, mainly due to 2008 fiscal year's net income, and (ii) higher supplemental capital, for Ps.135 million, due to the increase in the balance of the Bank's subordinated debt, attributable to the increase in the quotation of the US Dollar. Offsetting these effects, an increase of Ps.75 million was recorded, due to higher organization and development expenses.

## RECENT DEVELOPMENTS

### **Banco Galicia Uruguay**

On May 15, 2009 Banco Galicia Uruguay cancelled in advance the remaining outstanding balance of its restructured debt, the original due date of which was September 2011.

On May 2009, an extraordinary meeting of Banco Galicia Uruguay's shareholders approved a voluntary reduction of its capital.

### **Agreement to purchase Compañía Financiera Argentina**

In order to consolidate its expansion strategy in the Argentine market, on June 2, 2009, the Bank entered into an agreement with American International Group Inc. ("AIG"), to purchase 80% of the shares of Compañía Financiera Argentina S.A. ("CFA"), Cobranzas & Servicios S.A. and AIG Universal Processing Center S.A. The Bank agreed to pay Ps.133.2 million, once the Argentine Central Bank's approval is granted.

CFA is a leading provider of personal loans in Argentina, with 93 branches nationwide, distribution agreements with more than 3,900 retailers and approximately 1 million customers. As of March 31, 2009, (last public information available), its total assets amounted to approximately Ps.1.5 billion, its loans to Ps.1.0 billion and its shareholders' equity to Ps.833 million.

In addition, the Bank has an option to buy the remaining 20% of the shares that can be exercised 90 days after the takeover of the company.

### **Development of Microfinance**

In July 2009, the Bank signed an agreement with Red Argentina de Instituciones de Microcrédito (RADIM, an Argentine microfinance institutions network). The objective of this alliance is to strengthen local microfinance institutions ("MFIs"). To that purpose, the Bank launched a credit line for the development of MFIs which, in turn, grant microcredits to low-income homes, which usually don't have strong financial collaterals. Microcredits are short term loans for small amounts, for activities in connection to self-employment and home improvement activities, which aim is to improve life conditions of the poorest sectors.
